Professional Summary

Motivated frontend developer and Computer Science undergraduate with hands-on experience building responsive, component-driven web applications using **React.js**, **JavaScript (ES6+)**, HTML5, and CSS3. Skilled in RESTful API integration, React hooks, state management, and Git-based version control. Passionate about delivering clean, user-centric UI and continuously improving through modern frontend practices.

Technical Skills

Frontend	React.js, JavaScript (ES6+), HTML5, CSS3, Responsive Design, REST API Integration
Backend & DB	Node.js, Express.js, MongoDB, Basic Java, MySQL (fundamentals)
Tools & Practices	Git, GitHub, , Asynchronous JavaScript,

Projects

Dev Reddit – Community Discussion Platform

React.js | JavaScript ES6+ | CSS3 | REST API | Git

- Designed and built a Reddit-inspired community platform using **React.js** with a fully component-based architecture, leveraging props, state, and lifecycle methods.
- Implemented dynamic post creation, upvoting/downvoting, nested comment threads, and subreddit navigation as independent, reusable React components.
- Integrated **REST APIs** for live post feeds and user data; handled asynchronous requests with `async/await` and graceful error handling.
- Applied **responsive design** principles to deliver a consistent UX across mobile, tablet, and desktop viewports.
- Managed application state using **React hooks** (`useState`, `useEffect`, `useContext`), reducing prop-drilling and improving maintainability.
- Maintained clean, modular code with **Git** version control, working in feature branches and following SDLC best practices.

Weather App

HTML5 | CSS3 | JavaScript | REST API

- Built a fully responsive weather application using vanilla JavaScript, HTML5, and CSS3.
- Integrated a third-party REST API to fetch and display real-time weather data including temperature, humidity, and forecasts.
- Implemented asynchronous API calls using the Fetch API with proper error states for invalid city inputs.
- Practiced cross-browser compatibility and responsive layout techniques for varied screen sizes.

Airbnb Full Stack Clone

Node.js | Express.js | HTML5 | CSS3 | JavaScript | MongoDB

- Built a full-stack web application replicating core Airbnb features: property listings, search, and booking flow.
- Implemented **RESTful API** routes and server-side logic using Express.js with middleware for request handling.
- Designed and connected a **MongoDB** database for data persistence; structured models for users, listings, and reviews.
- Applied a modular, component-like structure on the frontend with clean HTML/CSS and JavaScript for dynamic rendering.

Education

Islamic University of Science and Technology 2022 – Present
B.Tech in Computer Science and Engineering · Jammu & Kashmir, India
Relevant coursework: Web Technologies, DBMS, Software Engineering

Boys Higher Secondary School, Kupwara 2020
Senior Secondary (Science) · Percentage: 78.6%

Languages

English (Fluent) | **Urdu** (Fluent)
