SUMMARY

Full-stack developer (MERN) and 2026 B.Tech CSE graduate who builds and deploys AI-integrated web applications end to end. Built VivaCoach, an AI mock-interview platform actively used by university students, and SmartSplit, a real-time expense-splitting app with a custom debt-simplification algorithm. Strong in REST APIs, JWT authentication, Socket.IO and LLM integrations (Gemini, Groq). Seeking an SDE or full-stack developer role to contribute from day one.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), Java, C
- **Frontend:** React.js, HTML5, CSS3, Tailwind CSS, Vite, Responsive Design
- **Backend:** Node.js, Express.js, RESTful APIs
- **Real-time & Auth:** Socket.IO, JWT Authentication
- **Database:** MongoDB, Schema Design, Data Modeling
- **AI/API Integration:** Gemini API, Groq, Hugging Face
- **Tools:** Git, GitHub, Postman, VS Code

PROJECTS

VivaCoach — AI Interview Coaching Platform viva-coach-ai.vercel.app

React · Vite · Node.js · Express.js · MongoDB · JWT · Gemini API · Groq

- Built and deployed a full-stack interview coaching platform actively used by students at my university, replacing unstructured practice with automated, structured AI feedback after every recorded session.
- Architected a modular backend spanning authentication, AI feedback generation, and performance reporting across 6+ route groups, secured end-to-end with JWT.
- Built a performance dashboard surfacing per-session scores and improvement trends, giving students actionable, trackable feedback that drove repeat usage.

SmartSplit — Collaborative Expense Tracker *(Deployment in progress)*

React · Node.js · Express.js · MongoDB · Socket.IO · JWT · Tailwind CSS

- Engineered a debt-simplification algorithm that minimizes the number of transactions needed to settle balances across a group, eliminating unnecessary back-and-forth payments between members.
- Built real-time group chat, live presence indicators, and instant balance updates using Socket.IO, keeping every member in sync without manual refreshing.
- Designed a secure, JWT-authenticated backend covering the full expense lifecycle — creation, group management, and settlement.

AI Note App — Smart Note-Taking Tool ai-note-app-iota.vercel.app

React · JavaScript · Tailwind CSS · REST API

- Built an AI-powered note-taking app that auto-summarizes entries and suggests tags, cutting the manual effort needed to keep notes organized.
- Designed a responsive, minimal-friction React UI optimized for speed and consistency across screen sizes.

EDUCATION

Islamic University of Science and Technology — Awantipora, J&K, India

- B.Tech in Computer Science and Engineering | 2022 – 2026 | CGPA: 7.07 / 10
- Relevant Coursework: Web Development, Databases, Software Engineering, Data Structures & Algorithms

LANGUAGES

English (Fluent) | Urdu (Fluent) | Kashmiri (Native)
